GOV. BROWARD SPEAKS AT DAYTONA.

Hon. Napoleon B. Broward, Florida's fearless and honest Governor, gave an address on the draining of the Everglades to an audience of 400 or 500 persons in Daytona last night. He spoke for two hours, during which time the audience was in full sympathy with him. His reference to personal experiences of railroad power in legislation, and his elucidation of the drainage matter, were clear, distinct and to the point. The audience was as quiet as in a church, except during the frequent applause. At the conclusion of the address the audience voted unanimously, without a dissenting vote, to stand by their Governor. The Governor's friends in DeLand are trying to induce him to come to DeLand Monday night, and he will do so if it is possible. Notice will be given.

His education of the drainage matter is most convincing of his honesty and integrity. He plainly states that he considers himself a servant of the people, and shows how he is trying to save to them the three million acres of land left to them by the railroads, which have already received 17,000,000 acres granted by the Legislature and now want all the rest owned by the State.

The meeting was presided over in a graceful manner by Dr. H. K. Dubois, of Port Orange.

The Bengali has the best brains of all the peoples in India and the readiest tongue. His memory is prodigious and his fertility in talk inexhaustible. He is something of an Irishman, something of an Italian, something of a Jew; if one can conceive an Irishman who would run away from a fight instead of running into it, an Italian without a sense of beauty and a Jew who would not risk £5 on the chance of making £500. He is very clever, but his cleverness does not lead him far on the road to achievement, for when it comes to doing rather than talking, he is easily passed by people of far inferior ability.—London Standard.
